

Find out how much you could be saving on prescription costs

Prescription drug cost jumped 9.4% in 2025,¹ with some specialty medications costing employers as much as \$250K per employee per year. Employers are scrambling for ways to manage their spend while still meeting employee needs.

Stop scrambling and start saving with National Integrative Health's (NIH) comprehensive fiduciary pharmacy purchasing program.

A "Pharmacy in the Sky"

The NIH Group Purchasing Organization Pharmacy Network is an all-inclusive, fiduciary pharmacy sourcing network that leverages the **lowest net acquisition cost for the plan sponsor, anywhere that medication is available in the world.**² With several supply channels available, plan sponsors have full control over which pathways are turned on or off.

Designed to decrease costs of high-cost medications, the program supplies infusion, all specialty (including cold-chain) and high-cost brand drugs to plan sponsors and their administrators.

Certified Savings³

By actuaries at stop loss carriers and Managing General Underwriters all over the United States.

Savings Example

Drug Name	Estimated Actual Client Cost per Prescription ⁴	NIH "Best in All" Costs	Savings per Prescription
SKYRIZI® Pen	\$12,434	\$8,117	\$4,317

¹ Mercer's National Survey of Employer-Sponsored Health Plans.

² Tier 1 countries only (those that regulate their pharmaceutical industry to ensure the safety and effectiveness of their drugs through the entire development, manufacturing and sales process and have a clear procedure for reporting adverse reactions and for withdrawing unsafe or ineffective drugs).

³ NIH clients using their program and plan design have received 5-10% renewal discounts from stop loss carriers.

⁴ Based on analysis of 68 Benefitfocus self-funded employer clients with Benefitplace and Health Insights for the period 10/1/24 - 9/30/25. Estimated actual client cost per prescription based on the average the plan paid per prescription, minus the estimated rebate.

⁵ Analysis of 68 Benefitfocus self-funded employer clients with Benefitplace and Health Insights for period 10/1/24 - 9/30/25. Savings are representative of what these clients could have saved by sourcing just these two medications through NIH. Actual results may vary.

How it Works

- 1 Employer chooses which medications to source and which sourcing channels to include.**
- 2 Prescriptions sent to NIH for fulfillment.**
- 3 NIH finds the best “all-in” price from chosen channels.**
- 4 Prescriptions shipped to members with:**
 - ✓ No changes to therapy or drug formulation
 - ✓ Clear communication and concierge-like access to NIH Pharmacy Team for questions
 - ✓ Reliable fulfillment and delivery
 - ✓ Clinical oversight for coordination on refills, timing, and dose management
 - ✓ \$0 out of pocket cost

Designed for Compliance with:

- ✓ Federal personal-importation rules
- ✓ FDA safety parameters
- ✓ The Consolidated Appropriations Act
- ✓ State-Specific pharmacy and benefit regulations
