

## Carrier Billing Services

Streamline your entire benefits billing process with our **full-service solution**

Expanding your benefits offering can mean great things for your organization's ability to attract and retain talent. But it can also mean adding more complexity to your billing processes—more premiums to track, more adjustments to apply, more reports to review... in short, more work for your benefits team.

### It doesn't have to be that way.

Benefitfocus offers a full-service carrier billing solution to make your monthly billing and payment process quick and simple.

We'll gather your list bills, generate your self bills, consolidate them all and reconcile them against enrollment data. We can even remit payment for you, too!

Through a combination of powerful technology and expert service, we do all the heavy lifting for you - so you can offer a robust benefits package without worrying about additional administrative headaches.

### Make life easy for accounting

Multiple P&Ls or cost centers? Our cost allocation report shows every charge from every invoice summarized by employee and cost center.

### Key Features and Benefits

- ✓ Save time by eliminating need to manage multiple separate carrier invoices
- ✓ Mitigate risk of inaccurate payments and coverage errors
- ✓ Support self-bill and list-bill carriers
- ✓ Cost allocation, reconciliation and payment remittance
- ✓ Location-based invoicing and intra-company billing
